

## **2006 DVD Table of Contents**

### **Disc 1**

#### **NFSTC Update: Firearms CD-ROM Initiative**

David Epstein, National Forensic Science Technology Center, Largo, FL

#### **What's New in Ammunition**

George Kass, Forensic Ammunition Service, Okemos, MI

#### **2006 SWGGUN Update**

Peter Striupaitis, A & P Training Consultants, Palos Heights, IL

#### **Recall / Safety Warning List Update**

Dom Denio, Federal Bureau of Investigation, Quantico, VA

#### **AFTE 2007 Training Seminar Update**

John Sanchez & Andy Smith, San Francisco Police Department, San Francisco, CA

#### **3D Imaging: Targeting Better Bullet Results**

Alain Beauchamp, Forensic Technologies Inc., Montreal, Quebec, Canada

#### **A Classification Method for the Mechanisms of Penetrating Trauma**

David Andrew, Queensland Health, Toowoomba, Queensland, Australia

#### **Surface Topography Analysis for a Feasibility Assessment of a National Ballistics Imaging Database**

Dr. Theodore Vorburger, National Institute of Standards and Technology, Gaithersburg, MD

#### **Recent Changes in UK Firearms Legislation and the Effects on the Casework Submissions Seen at the Forensic Science Service Limited**

Alice Walters, Forensic Science Service Limited, London, United Kingdom

#### **Fire Damage: The Ability to Make Identifications on Bullets and Cartridge Cases**

Kristin Gerber & Jodi Marsanopoli, ATF National Laboratory Center, Ammendale, MD

#### **Going Further with GSR Analysis: The Adaptation of SWG-MAT Trace Evidence Recovery Guidelines for the Analysis of Gunshot Residues on Clothing**

Richard N. Ernest, Alliance Forensics Laboratory, Inc., Fort Worth, TX

### **Disc 2**

**A Statistical Validation of the Individuality of Striated Tool Marks using Topographical Data**

Anurag Jain, Intelligent Automation Inc., Rockville, MD

**Security Threat from Bump Keys**

Marc Weber Tobias, Investigative Law Offices, Sioux Falls, SD

**A Statistical Analysis of Shotgun Pellets in Flight: A Feasibility Study**

Jan De Ceuster, National Institute of Forensic Science, Brussels, Belgium

**Physical Matches and Brand Mark Examination on Livestock & Forensic Odontology**

BA Kloppers, Ballistics Unit, Forensic Science Laboratory, South African Police Service

**Reflections on Projectile Energy and Airguns**

Robert Caunt, Vancouver Police Department, Vancouver, British Columbia, Canada

**Magazines: Their Marks and Their Meaning**

Charles M. Clow, Southwestern Institute of Forensic Sciences, Dallas, TX

**A Numerical Comparison Study of Five Different Chemical Procedures using Griess Reagents**

Garry Lawrence, Centre of Forensic Sciences, Toronto, Ontario, Canada

**3D Consecutive Matching Stria Research**

Alain Beauchamp, Forensic Technologies Inc., Montreal, Quebec, Canada

**Disc 3**

**An Evaluation of Body Armor**

Nancy D. McCombs & Michael A. Appel, California State DOJ, Fresno, CA

**Borescopes for Forensic Scientists: An Update**

Ken Harrington, Gradient Lens Corporation, Rochester, NY

**Practical Considerations for Using Sound Level Meters to Accurately Measure Gunshot Noise**

Robert G. Brauch, Larson Davis, Inc., Depew, NY

**PERMA-GEL: A New Synthetic Ballistic Gelatin**

Dr. Daryl D. Amick, PERMA-GEL, Inc., Albany, OR

**GSR on Hands – Totally Useless?**

Axel Manthei, Bavarian State Bureau of Investigation, Munich, Bavaria, Germany

**Agua IQ Ammunition**

Dale Justice, Bexar County Crime Laboratory, San Antonio, TX

**Bullet Holes in Wood: What Can be Determined from Them?**

Lucien C. Haag, Independent Examiner, Carefree, AZ

## **The Lincoln Target Board**

Lucien C. Haag, Independent Examiner, Carefree, AZ

## **Disc 4**

### **The Scientific Foundations of Firearms and Tool Mark Identification – Responding to Recent Challenges**

Ron Nichols, ATF Forensic Laboratory, Walnut Creek, CA

### **Viewing and Training Tool of Known Match and Known Non-Match Comparison**

Tsuneo Uchiyama, National Research Inst. Of Police Science, Kashiwa, Chiba, Japan

### **Sub-Class Characteristics of Ruger Firearms**

Greg Scala, FDLE, Orlando, FL

### **Utilizing Cattle Blade Bones as Test Medium in the Identification of a Toolmark on Human Skull**

Stephen H. Ostrowski, New Hampshire State Police Forensic Lab, Concord, NH

### **The Influence of Intermediate Objects Positioned Close to the Muzzle of a Firearm**

Matthew Noedel, Noedel Scientific, Puyallup, WA

### **Firearms – Toolmarks Error Rate Computation and Analysis**

Doug Murphy, Federal Bureau of Investigation, Quantico, VA
