

2013 DVD Table of Contents

Disc 1

AFTE 2013 Keynote Speaker

Secretary Gordon E. Eden Jr., New Mexico Department of Public Safety

AFTE 2014 Update

Rick Wyant, Washington State Patrol

What's New in Ammunition?

George Kass, Forensic Ammunition Service Inc.

Inter-Comparison of 1000 Consecutively Fired 9mm Luger Bullets and Cartridge Cases from a Ruger P89 Pistol Utilizing Pattern Matching and Quantitative Consecutive Matching Striae as Criteria for Identification

Cary Wong, Alameda County Sheriff's Office

SWGgun - Updates and Current Projects

Andy Smith, San Francisco Police Department

The Sound of Shots

Nancy McCombs, California Department of Justice - Fresno

Physics and Mathematical Analysis of Gunshot Sounds: Parameters and Their Characteristics

Nick Tsiatis, Hellenic Police

Muzzle-To-Target Distance Determination in a Homicide by Black Powder Revolver

Alison L. Quereau, Palm Beach County Sheriff's Office

The Clackamas Town Center Shooting

Dan Alessio, Oregon State Police Forensic Laboratory

Disc 2

The Restoration of Rusted Firearms: An Evaluation of Different Methods

Derek Mears, Salt Lake City Police Department

Measurement and Comparison of Fractured Surfaces

Ashraf Bastawros, Iowa State University

High-Definition 3D Sensor Optimized for the Capture of Spent Cartridge Case Markings

Serge Levesque, Forensic Technology, Inc.

Bullet Path Reconstruction: Probe Method Accuracy and Error Rate

Chirs Coleman, Contra Costa Office of the Sheriff

ENFSI Collaborative Study on the Forensic Determination of Shooting Distances

Ludwig Neiwoehner, Bundeskriminalamt

Angle of Impact Determination from Bullet Holes

Kenton Wong, Forensic Analytical Sciences, Inc.

The Identification of Bullets Fired from 10 Consecutively Rifled 9mm Luger Pistol Barrels: An Update with a Discussion on Recent Legal Challenges

Jim Hamby, International Forensic Science Laboratory

Dave Brundage, Independant Examiner

The Examination, Evaluation and Identification of 9mm Cartridge Cases Fired from 1,590 Different Glock Semiautomatic Pistols Manufactured Over a 21 Year Period: Using Optical Comparison Microscopy, Confocal Microscopy and Computational Pattern Recognition

Jim Hamby, International Forensic Science Laboratory

Steve Norris, Wyoming State Crime Laboratory

The Examination, Evaluation and Identification of 40 S&W Caliber Cartridge Cases Fired from 1,079 Different Glock 40 S&W Semiautomatic Pistols Manufactured Over a 6 Year Period

Jim Hamby, International Forensic Science Laboratory

Caught in the Crossfire

John Collins, RTI International

Disc 3

Cap Gun Modification

Kathy Geil, Washington State Patrol - Seattle

Detecting and Identifying Bullet Holes by Tracer Bullets

Lucien Haag, Forensic Science Services

Shooting Reconstruction: Combining Audio, Video, and Movement

Alexander Jason, ANITE Group

Determining Bullet Direction from Clothing Fibers

Alexander Jason, ANITE Group

Analysis and Sequencing of Bullet Strikes on the Spoke of a Moving Wheel

Justin Bechaver, Utah Bureau of Forensic Services

Lead-Free Hunting Bullets

James L. Roberts, Ventura Co. Sheriff's Lab

An Experimentally and Experimentally Determined Caveat: Low Gunshot Residue Ammunition

Gary E. Dale, M.D., Montana Division of Forensic Science

Mis-Adventures in Metallurgy: Case Examples, Guns & Ammo

Frederick Schmidt, Chicago - ESI

Development of a 3D-Topography Imaging and Analysis System for Firearm Identification using GelSight and Feature-Based Case Matching

Ryan Lilien, Cadre Research Laboratory

Todd Weller, Oakland Police Department

Disc 4

Automated Comparison of Land Impressions Imaged by Confocal Microscopy

David Read, National Institute of Standards and Technology (NIST)

Virtual Tool Mark Generation for Efficient Striation Analysis

Laura Ekstrand, Iowa State University

An Empirical Study to Improve the Scientific Foundation of Forensic Firearm and Tool Mark Identification Utilizing Consecutively Manufactured Glock EBIS Barrels with the Same EBIS Pattern

Gabriel Hernandez, Miami-Dade Police Department

Validation Tests and Error Rate Calculations for the Congruent Matching Cells (CMC) Method Using Cartridge Cases Fired with Consecutively Manufactured Pistol Slides

John Song, National Institute of Standards and Technology (NIST)

Initial Correlation Tests and Analysis for Cartridge Case Intensity Images Using the Congruent Matching Cells (CMC) Method

Robert Thompson, National Institute of Standards and Technology (NIST)

2D/3D Topography Comparisons of Toolmarks Generated by Consecutively Manufactured Chisels and Punches

Alan Zheng, National Institute of Standards and Technology (NIST)

Virtual Profile Generation for Assessing Statistical Properties of Striated Tool Marks

Martin Baiker, Netherlands Forensic Institute

Defining the Opposing Jaw Cutting Tool

John O'Neil, Independent Consultant

Casting of Toolmarks on Cartilage In-Situ

Brian Smelser, Washington State Patrol Crime Laboratory

Primer and Cartridge Case Movement During the Ignition Phase

Axel Manthei, Bavarian State Crime Laboratory

Disc 5

The Assassination of John Fitzgerald Kennedy - The Ballistics Evidence in the Assassination of John Fitzgerald Kennedy

Lucien Haag, Forensic Science Services

The Assassination of John Fitzgerald Kennedy - Three Shots, Three Cartridge Cases, Two Bullets: What Became of the Missing Bullet

Lucien Haag, Forensic Science Services

The Assassination of John Fitzgerald Kennedy - Modern Techniques that could be Applied Today to this 50-year old Evidence

Lucien Haag, Forensic Science Services

The Assassination of John Fitzgerald Kennedy - History of the Carcano Rifle

Lucien Haag, Forensic Science Services

A Case Study of Extraordinary Toolmarks on a Fatal Bullet

Gerard Dutton, Tasmania Police Department

A Discussion and Comparison of Active Shooter Scenarios

Sgt. Drew Bader, Albuquerque Police Department

SWAT Gear and Its Employment for the Forensic Scientist

Sgt. Drew Bader, Albuquerque Police Department
