

## **Electronic Resource Committee**

### **Mission**

- The primary objective of this committee is to design and maintain a database of technical reference materials, including images, data, and documents, relevant to the field of Firearm and Tool Mark Identification accessible to the membership through the AFTE website.

### **Areas to Explore**

- Developing a centralized area of technical information for firearm examiners that links together multiple databases for ease of use and cohesiveness.
- Currently those databases include:
  - General Rifling Characteristics
  - Class Characteristic Matrix
  - Trigger Pull Data
- Maintain and update technical information related to safety recall warnings.
- Maintain and update the Admissibility Resource Kit.
